Education

Brigham Young University - Idaho Sept 2024 – April 2029
Bachelor of Computer Science
Minor of Data Science
GPA: 4.0

Projects

Hackathon Winner Feb 27-28 2026
HackUSU

- Built a governed analytics platform ("Sales Dashboard Factory") in a 17-hour hackathon sprint, earning 2nd place in the Data App Factory challenge.
- Developed a Streamlit-based application with conversational AI that converts natural language into secure, validated SQL queries using Databricks and Unity Catalog.
- Collaborated in a fast-paced team environment to design role-based data access, implement SQL guardrails, and deploy a scalable, secure data solution.

Zoom Zone Dec 2025 – Jan 2026
Personal Project

- Developed a full stack scheduling platform that automated 100% of meeting creation by integrating Google Calendar and Zoom APIs to eliminate double booking.
- Engineered a serverless backend on Vercel using Supabase and secure OAuth token handling, maintaining data persistence for all user bookings.
- Implemented a Calendly-style booking interface that displays real-time availability and allows users to schedule meetings through a guided flow.

Secretary of the Hackathon Society Feb 2025 – Nov 2025
BYU-I

- Facilitated team alignment by documenting committee discussions and distributing action items to ensure all project goals were met.
- Coordinated logistics for 35+ teams and 150+ attendees, overseeing the seamless distribution of information and food throughout the 24 hour event.
- Evaluated participant projects as a judge and managed the creation and presentation of official awards for the closing ceremony.

Experience

Team Member, Target Jul 2025 – Sept 2025
Queen Creek, Arizona

- Consistently reported at 4 AM to unload delivery trucks.
- Collaborated with a team to unload and organize high volume shipments within tight 2 hour windows.
- Processed and distributed 500+ items of merchandise daily with high accuracy

Team Member, Tim Hortons Aug 2023 – Aug 2024
Keswick, Ontario, Canada

- Collaborated with a team of 10+ to maintain 30 second service speeds in a high volume environment.
- Served 200+ customers daily with a 98% order accuracy rate through clear, efficient communication.
- Resolved 100% of customer issues on-site using professional conflict resolution to ensure guest satisfaction.
